

**REMARKS**

During a conversation between Examiner Fiona Powers and the undersigned attorney on November 2, 2009, it was indicated that the X-ray powder pattern on page 12 of the original specification should be entered as a drawing. To this end, the above amendments to the specification delete the X-ray powder pattern from and appropriately amend page 12, and add a figure description to page 1.

The changes to the specification are believed necessary to afford applicants proper protection for the invention, are consistent with prior disclosure and would not change the scope of the claims or require further examination.

Since the amendment does not involve any further search of the prior art or further examination, applicants respectfully request entry of this amendment under 37 CFR §1.312.

If any matters remain to be resolved, the Examiner is invited to contact applicants' attorney at the number listed below.

Respectfully submitted,

Wayne J. Dustman  
Attorney for Applicant  
Registration No. 33,870
